**Re: Yosemite Creek Superfund Site, San Francisco, CA
Amended Response to 104(e) Information Request**

Dear Mr. Whitenack:

www.porterscott.com

This correspondence follows our telephone conversation several months ago, wherein we met and conferred regarding our prior responses to the United States Environmental Protection Agency's ("EPA") request for information ("RFI") from InterState Oil with regard to the Yosemite Creek Superfund site (the "Site"), pursuant to Section 104(e)(2)(A) of the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") (EPA may request information "relevant to . . . [t]he identification, nature, and quantity of materials which have been . . . transported to a . . . facility"). As a result of that conversation, we have agreed to provide these amended responses and documents.

AMENDED RESPONSES TO OCTOBER 15, 2009 EPA INFORMATION REQUESTS:

1. *Describe generally the nature of the business conducted by Respondent and identify the products manufactured, formulated, or prepared by Respondent throughout its history of operations.*

RESPONSE:

InterState Oil commenced doing business as a sole proprietorship in October of 1970. Since its inception, the company has been a wholesale distributor of petroleum and automotive related products. Over the past forty years, InterState Oil has expanded from its office in Sacramento to provide coverage throughout California and Nevada, and has branch locations in Elks and Sparks in Nevada and Fresno, McClellan, Oroville, Redding, and Woodland in California. However, from 1974 to 1980, InterState Oil operated exclusively out of its main office in Sacramento California.

Currently, InterState Oil sells various fuel products, including the following: unleaded gasoline (87, 89, 91), clear and red-dyed ultra low sulfur diesel, biodiesel,

{00869806.DOC}

Craig Whitenack
May 20, 2011
Page 2

ethanol, dyed kerosene, diesel exhaust fluid, methanol, and Jet A. InterState Oil also sells numerous brand name vehicle lubricants, anti-freeze, filters, and lubricant equipment. In addition to selling fuel and fuel-related products, InterState Oil also provides on-site fueling services and fuel transporting services.

2. *Provide the name (or other identifier) and address of any facilities where Respondent carried out operations between 1940 and 1988 (the "Relevant Time Period") and that:*

- a. *ever shipped drums or other containers to the BAD Site for recycling, cleaning, reuse, disposal, or sale.*
- b. *are/were located in California (excluding locations where ONLY clerical/office work was performed);*
- c. *are/were located outside of California and shipped any drums or other containers to California for recycling, cleaning, reuse, disposal, or sale (for drums and containers that were shipped to California for sale, include in your response only transactions where the drums and containers themselves were an object of the sale, not transactions where the sole object of the sale was useful product contained in a drum or other container).*

RESPONSE:

InterState Oil did not ship drums or other containers to the BAD Site for recycling, cleaning, reuse, disposal, or sale. Bay Area Drum Company would come to InterState Oil's facility at 8221 Alpine Ave, Sacramento, California 95826 between December 1981 to February 1987 to inspect the drums, load the drums, transport them to the facility in the Bay Area. Bay Area Drum Company would then return drums to InterState Oil.

The returned drums were not necessarily the same drums that Bay Area Drum Company picked up from InterState Oil's facility. The same amount and type of drums were typically returned, but not necessarily the same exact drum. There is no way to know if the drums picked up by Bay Area Drum Company and taken to the BAD Site for reconditioning during the Relevant Time Period were the same drums that were returned to InterState Oil.

3. *Provide a brief description of the nature of Respondent's operations at each Facility identified in your response to Question 2 (the "Facilities") including:*

Craig Whitenack
May 20, 2011
Page 3

- a. *the date such operations commenced and concluded; and*
- b. *the types of work performed at each location over time, including but not limited to the industrial, chemical, or institutional processes undertaken at each location.*

RESPONSE:

As stated in Response No. 1 above, InterState Oil commenced doing business in approximately October of 1970. Since its inception, the company has been a wholesale distributor of petroleum and automotive related products.

InterState Oil evolved to its present condition where the majority of its product is sold in bulk form. For example, motor oils were bought in bulk and then pre-packaged in 55-gallon drums. During the early years of bulk sales, the empty drums were returned to the original supplier. Eventually, InterState Oil began purchasing in bulk and re-filled its own drums. This gave rise to the necessity to refurbish drums from time to time. Over the years, InterState Oil has dealt with a variety of companies for the purpose of cleaning and refurbishing 55-gallon drums.

One of these companies was Bay Area Drum Company. A brief review of these invoices reveals that the first invoice is dated December 10, 1981. Bay Area Drum Company would come to InterState Oil's facility in Sacramento where Bay Area Drum Company's employees would inspect the drums, load the drums, transport them to the facility in the Bay Area and recondition the drums. Bay Area Drum Company would then return drums to InterState Oil.

The returned drums were not necessarily the same drums that Bay Area Drum Company picked up from InterState Oil's facility. The same amount and type of drums were typically returned, but not necessarily the same exact drum. There is no way to know if the drums picked up by Bay Area Drum Company and taken to the BAD Site for reconditioning during the Relevant Time Period were the same drums that were returned to InterState Oil.

InterState Oil's best recollection is that the majority of the barrels that were reconditioned by Bay Area Drum Company contained residue of unused, new motor oils. These were HD (heavy duty) 30 weight, ND (non-detergent) 30 weight, and multi-

Craig Whitenack
May 20, 2011
Page 4

viscosity weight oils 5-30, 10-30, 10-40 and 20-50. During the years in question, 1981 through 1987, InterState Oil also sold smaller quantities of automatic transmission fluid, solvent, kerosene, and anti-freeze.

4. *For each Facility, describe the types of records regarding the storage, production, purchasing, and use of Substances of Interest ("SOI") during the Relevant Time Period that still exist and the periods of time covered by each type of record.*

RESPONSE:

InterState Oil has spreadsheets reflecting the amount of motor oils, solvent, kerosene, and anti-freeze it purchased from 1982 to 1987. Copies of these spreadsheets are attached as Exhibit A.

5. *Did Respondent ever (not just during the Relevant Time Period) produce, purchase, use, or store one of the COCs (including any substances or wastes containing the COCs) at any of the Facilities? State the factual basis for your response.*

RESPONSE:

Yes. This is based on current business practices and documents and records from the Relevant Time Period which are attached as Exhibits A and B.

6. *If the answer to Question 5 is yes, identify each COC produced, purchased, used, or stored at each Facility.*

RESPONSE:

InterState Oil sells various fuel products, including the following: unleaded gasoline (87, 89, 91), clear and red-dyed ultra low sulfur diesel, biodiesel, ethanol, dyed kerosene, diesel exhaust fluid, methanol, and Jet A. InterState Oil also sells numerous brand name vehicle lubricants, anti-freeze, filters, and lubricant equipment. During the Relevant Time Period, InterState purchased and stored at its Sacramento facility solvent, kerosene, antifreeze, and motor oils.

InterState Oil's best recollection is that the majority of the barrels that were reconditioned by Bay Area Drum Company contained residue of unused, new motor oils. These were HD (heavy duty) 30 weight, ND (non-detergent) 30 weight, and multi-viscosity weight oils 5-30, 10-30, 10-40 and 20-50.

7. *If the answer to Question 5 is yes, identify the time period during which each COC was produced, purchased, used, or stored at each Facility.*

Craig Whitenack
May 20, 2011
Page 5

RESPONSE:

1981-1987.

8. *If the answer to Question 5 is yes, identify the average annual quantity of each COC produced, purchased, used, or stored at each Facility.*

RESPONSE:

InterState Oil is attaching documents reflecting the amount of products, some of which may have contained COCS, purchased and stored at the Facility during the Relevant Time Period.

9. *If the answer to Question 5 is yes, identify the volume of each COC disposed by the Facility annually and describe the method and location of disposal.*

RESPONSE:

Bay Area Drum Company would come to InterState Oil's facility at 8221 Alpine Ave, Sacramento, California 95826 between December 1981 to February 1987 to inspect the drums, load the drums, transport them to the facility in the Bay Area. Bay Area Drum Company would then return drums to InterState Oil. Some of these drums may have contained residue of hydraulic oil. There was no way to calculate the volume of hydraulic oil residue remaining in the drums taken by Bay Area Drum Company. There is also no way to calculate the volume of COCs in each 55 gallon drum that InterState oil used to transport its motor oils to its various customers during the Relevant Time Period, assuming this is what is meant by "disposal."

10. *Did Respondent ever (not just during the Relevant Time Period) produce, purchase, use, or store hydraulic oil or transformer oil at any of the Facilities? State the factual basis for your response to this question.*

RESPONSE:

Yes. This is based on current business practices and the memory of current InterState employees.

11. *If the answer to Question 10 is yes, identify each specific type of hydraulic oil and transformer oil produced, purchased, used, or stored at each Facility.*

RESPONSE:

AW 32 hydraulic oil, AW 36 hydraulic oil, and Tractor Hydraulic Fluid (THF).

Craig Whitenack
May 20, 2011
Page 6

12. *If the answer to Question 10 is yes, identify the time period during which each type of hydraulic oil and transformer oil was produced, purchased, used, or stored.*

RESPONSE:

1981-1987.

13. *If the answer to Question 10 is yes, identify the average annual quantity of each type hydraulic oil and transformer oil purchased, produced, used, or stored at each Facility.*

RESPONSE:

Identifying the average annual quantity of each type of hydraulic oil and transformer oil purchased and stored at InterState's Sacramento facility during the Relevant Time Period and beyond is not feasible because it has been in business since 1970 and has had a long history as a wholesale distributor of petroleum and automotive related products.

InterState Oil has attached as Exhibit A spreadsheets of purchase invoices for solvent, kerosene, anti-freeze and oil during the Relevant Time Period.

14. *If the answer to Question 10 is yes, identify the volume of each hydraulic oil and transformer oil disposed by the Facility annually and describe the method and location of disposal.*

RESPONSE:

Bay Area Drum Company would come to InterState Oil's facility at 8221 Alpine Ave, Sacramento, California 95826 between December 1981 to February 1987 to inspect the drums, load the drums, transport them to the facility in the Bay Area. Bay Area Drum Company would then return drums to InterState Oil. Some of these drums may have contained residue of hydraulic oil. There was no way to calculate the volume of hydraulic oil residue remaining in the drums taken by Bay Area Drum Company.

15. *Provide the following information for each SOI (SOIs include any substance or waste containing the SOI) identified in your responses to Questions 5 and 10:*

- a. *Describe briefly the purpose for which each SOI was used at the Facility. If there was more than one use, describe each use and the time period for each use;*

Craig Whitenack
May 20, 2011
Page 7

- b. *Identify the supplier(s) of the SOIs and the time period during which they supplied the SOIs, and provide copies of all contracts, service orders, shipping manifests, invoices, receipts, canceled checks and other documents pertaining to the procurement of the SOI;*
- c. *State whether the SOIs were delivered to the Facility in bulk or in closed containers, and describe any changes in the method of delivery over time;*
- d. *Describe how, where, when, and by whom the containers used to store the SOIs (or in which the SOIs were purchased) were cleaned, removed from the Facility, and/or disposed of, and describe any changes in cleaning, removal, or disposal practices over time.*

RESPONSE:

- a. InterState Oil did not use any of the SOIs at the facility. Any products containing SOIs were stored at the Facility were sold and transported to other locations that did not have any nexus with the BAD Site or the Yosemite Creek Superfund Site.
- b. During the Relevant Time Period, Kendall, Valvoline, and Castrol sold motor and hydraulic oil to InterState. No copies of contracts, service orders, shipping manifests, invoices, etc. presently exist because of the length of time that has elapsed. InterState Oil has attached a spreadsheet of purchase invoices for solvent, kerosene, anti-freeze and oil during the Relevant Time Period.
- c. Products containing the SOIs were delivered to the Facility in bulk and in closed containers. There have not been any changes in delivery over time.
- d. InterState Oil evolved to its present condition where the majority of its product is sold in bulk form. For example, motor oils were bought in bulk and then pre-packaged in 55-gallon drums. During the early years of bulk sales, the empty drums were returned to the original supplier. Eventually, InterState Oil began purchasing in bulk and re-filled its own drums. This gave rise to the necessity to refurbish drums from time to time. Over the years, InterState Oil has dealt with a variety of companies for the purpose of cleaning and refurbishing 55-gallon drums.

One of these companies was Bay Area Drum Company. A brief review of these invoices reveals that the first invoice is dated December 10, 1981. Bay Area Drum Company would come to InterState Oil's facility in Sacramento where Bay Area Drum Company's employees would inspect the drums, load

Craig Whitenack
May 20, 2011
Page 8

the drums, transport them to the facility in the Bay Area and recondition the drums. Bay Area Drum Company would then return drums to InterState Oil.

The returned drums were not necessarily the same drums that Bay Area Drum Company picked up from InterState Oil's facility. The same amount and type of drums were typically returned, but not necessarily the same exact drum. There is no way to know if the drums picked up by Bay Area Drum Company and taken to the BAD Site for reconditioning during the Relevant Time Period were the same drums that were returned to InterState Oil.

During the Relevant Time Period, there were no changes in InterState's cleaning, removal, or disposal practices of the 55-gallon drums.

16. *For each SOI delivered to the Facilities in closed containers, describe the containers, including but not limited to:*

- a. *the type of container (e.g. 55 gal. drum, tote, etc.);*
- b. *whether the containers were new or used; and*
- c. *if the containers were used, a description of the prior use of the container.*

RESPONSE:

- a. The SOI containing products were delivered to the Facility in 55-gallon drums.
- b. There was no way to know whether the 55-gallon drums were new or used. The drums appeared new, but there was no way to distinguish between new and refurbished old drums. A drum that was reconditioned by Bay Area Drum Company for InterState Oil could have been sold by Bay Area Drum Company to one of the previously-mentioned suppliers to store SOI containing products which could have been later sold to InterState. There was no way for InterState to determine the exact origin of the 55-gallon drums it purchased from its suppliers.

17. *For each container that Respondent used to store a SOI or in which SOIs were purchased ("Substance-Holding Containers" or "SHCs") that was later removed from the Facility, provide a complete description of where the SHCs were sent and the circumstances under which the SHCs were removed from the Facility. Distinguish between the Relevant Time Period and the time period since 1988, and describe any changes in Respondent's practices over time.*

Craig Whitenack
May 20, 2011
Page 9

RESPONSE:

InterState Oil objects to Request No. 17 as it assumes that each SHC is somehow individually identified, tracked, and used and reused by the same entity throughout the life of the SHC. There is no evidence that BAD operated in this way or that it tracked SHCs for its customers such that this information is available. Generally, SHCs, such as drums sent to drum reconditioners by a customer, are fungible commodities and are not individually tagged or tracked to ensure their return to that particular customer.

Some SHCs were delivered to InterState Oil's various customers and were kept by the customers. Once delivered the customer, InterState Oil had no further knowledge of or connection to the SHC. In some situations, the product containing the SOIs was emptied from a SHC to a customer's tank or storage facility. InterState Oil made sure to empty as much of the product as possible into the customer's tank or storage facility. The SHC was then returned to InterState Oil's facility where it was picked up by Bay Area Drum Company to be reconditioned if necessary. The emptied drums picked up by Bay Area Drum Company may have contained a minute amount of remaining SOIs. It was impossible to determine the quantity of SOIs remaining in the SHCs picked up by the Bay Area Drum Company.

It was also impossible to track the course of a particular SHC once it was removed from InterState Oil's facility by Bay Area Drum Company. The returned drums were not necessarily the same drums that Bay Area Drum Company picked up from InterState Oil's facility. The same amount and type of drums were typically returned, but not necessarily the same exact drum. There is no way to know if the drums picked up by Bay Area Drum Company and taken to the BAD Site for reconditioning during the Relevant Time Period were the same drums that were returned to InterState Oil.

InterState Oil has always been careful to avoid spilling any products containing SOIs. Over the course of the company's history, it has become even more stringent regarding how much product remains in its empty drums. This is based on the evolution of industry standards over time and improvements in technology. For example, during the Relevant Time Period, InterState oil poured the product into a customer's tank or storage facility. Today, InterState is able to vacuum all of the remaining product from the SHC before the drum is reconditioned. Drum reconditioning companies now do not accept any drums containing even a trace amount of product inside.

18. *For each SHC that was removed from the Facility, describe Respondent's contracts, agreements, or other arrangements under which SHCs were removed from the Facility, and identity all parties to each contract, agreement, or other arrangement described. Distinguish between the Relevant Time Period and the time period since 1988.*

Craig Whitenack
May 20, 2011
Page 10

RESPONSE:

The contracts and agreements under which the SHCs were removed from InterState's Facility were typically made up of invoices and receiving tickets. InterState Oil has attached as Exhibit B all documentation it has regarding any contracts or agreements between itself and the Bay Area Drum Company.

19. *For each SHC, provide a complete explanation regarding the ownership of the SHC prior to delivery, while onsite, and after it was removed from the Facility. Distinguish between the Relevant Time Period and the time period since 1988, and describe any changes in Respondent's practices over time.*

RESPONSE:

InterState Oil objects to Request No. 19 as it assumes that each SHC is somehow individually identified, tracked, and used and reused by the same entity throughout the life of the SHC. There is no evidence that BAD operated in this way or that it tracked SHCs for its customers such that this information is available. Generally, SHCs, such as drums sent to drum reconditioners by a customer, are fungible commodities and are not individually tagged or tracked to ensure their return to that particular customer. Accordingly, Request No. 19 purports to seek information that does not exist. As stated in the RFI, "EPA is seeking to identify parties that have or may have contributed to contamination at the Site." However, Request No. 19 purports to seek information regarding SHCs that were sent to sites other than the BAD Site.

InterState Oil owned the SHC while it was at Interstate Oil's Facility. Once InterState Oil delivered the SHC to a customer, the customer then owned the SHC. Once the Bay Area Drum Company picked up the SHC from Interstate Oil's Facility, the Bay Area Drum Company then owned the SHC. InterState Oil's practices regarding SHC ownership have not changed throughout the course of its history.

20. *Identify all individuals who currently have, and those who have had responsibility for procurement of Materials at the Facilities. Also provide each individual's job title, duties, dates performing those duties, current position or the date of the individual's resignation, and the nature of the information possessed by each individual concerning Respondent's procurement of Materials.*

RESPONSE:

Terry W. Andrews, Bill Simas, and Royce G. Andrews (deceased January 2, 1992) would be the individuals most knowledgeable with respect to the 55-gallon drum products.

Craig Whitenack
May 20, 2011
Page 11

Terry W. Andrews is the current president of InterState Oil and has held this position since [Privacy Act] when the company was first founded. As president, Mr. Andrews' duties include general oversight and advancement of the company.

Bill Simas is the current sales manager for InterState Oil and has held this position since [Privacy Act]. As sales manager, Mr. Simas' duties include purchasing and selling the various products sold by InterState Oil, as well as general oversight and advancement of the company.

Royce G. Andrews, InterState Oil's Purchasing Manager, was the individual with InterState Oil who dealt with the barrel reconditioning companies.

21. *Describe how each type of waste containing any SOIs was collected and stored at the Facilities prior to disposal/recycling/sale/transport, including:*

- a. *the type of container in which each type of waste was placed/stored;*
- b. *how frequently each type of waste was removed from the Facility; Distinguish between the Relevant Time Period and the time period since 1988, and describe any changes in Respondent's practices over time.*

RESPONSE:

InterState Oil objects to this Request in that it seeks information that does not relate to the BAD Site which is the subject of this litigation. During the Relevant Time Period, Bay Area Drum Company would come to InterState Oil's facility in Sacramento where Bay Area Drum Company employees would inspect the drums, load the drums, transport them to the facility in the Bay Area and recondition the drums. Bay Area Drum Company would then return the drums to InterState Oil. This occurred approximately once a week.

22. *Describe the containers used to remove each type of waste containing any SOIs from the Facilities, including but not limited to:*

- a. *the type of container (e.g. 55 gal. drum, dumpster, etc.);*
- b. *the colors of the containers;*
- c. *any distinctive stripes or other markings on those containers;*
- d. *any labels or writing on those containers (including the content of those labels);*

Craig Whitenack
May 20, 2011
Page 12

- e. *whether those containers were new or used; and*
- f. *if those containers were used, a description of the prior use of the container;*

Distinguish between the Relevant Time Period and the time period since 1988, and describe any changes in Respondent's practices over time.

RESPONSE:

InterState Oil objects to Request No. 22 as it assumes that each SHC is somehow individually identified, tracked, and used and reused by the same entity throughout the life of the SHC. There is no evidence that BAD operated in this way or that it tracked SHCs for its customers such that this information is available. Generally, SHCs, such as drums sent to drum reconditioners by a customer, are fungible commodities and are not individually tagged or tracked to ensure their return to that particular customer.

If any containers contained any SOIs they would likely be 55 gallon drums. The SHCs were blue, red, green with white stripes, black with white stripes, and black with red stripes. They also contained labels describing their content, but did not have any indication of whether they were new or used. InterState assumed the SHCs they received from their suppliers were new, but there was no way to be certain based on the fungible nature of the SHCs.

23. *For each type of waste generated at the Facilities that contained any of the SOIs, describe Respondent's contracts, agreements, or other arrangements for its disposal, treatment, or recycling and identify all parties to each contract, agreement, or other arrangement described. State the ownership of waste containers as specified under each contract, agreement, or other arrangement described and the ultimate destination or use for such containers. Distinguish between the Relevant Time Period and the time period since 1988, and describe any changes in Respondent's practices over time.*

RESPONSE:

InterState Oil owned the container while it was at Interstate Oil's Facility. Once Bay Area Drum Company picked up the SHC from Interstate Oil's Facility, Bay Area Drum Company then owned the SHC. This agreement was reflected in invoices and receiving tickets, copies of which are attached as Exhibit B. Once Bay Area Drum Company picked up the containers, there was no way to determine the ultimate destination or use for such containers. A specific container that Bay Area Drum Company picked up could have been returned to InterState Oil in the future, or it could have been sold to a different company. There was no way to determine this.

Craig Whitenack
May 20, 2011
Page 13

24. *Identify all individuals who currently have, and those who have had, responsibility for Respondent's environmental matters (including responsibility for the disposal, treatment, storage, recycling, or sale of Respondent's wastes and SHCs). Provide the job title, duties, dates performing those duties, supervisors for those duties, current position or the date of the individual resignation, and the nature of the information possessed by such individual's resignation, and the nature of the information possessed by such individuals concerning Respondent's waste management.*

RESPONSE:

Identifying all individuals who currently have, and those who have had, responsibility for InterState Oil's environmental matters at all of InterState Oil's Facilities, including those that have no nexus to the BAD Site, is not feasible because it has been in business since 1970 and has had a long history as a wholesale distributor of petroleum and automotive related products.

Terry W. Andrews, Bill Simas, and Royce G. Andrews (deceased January 2, 1992) would be the individuals most knowledgeable with respect to the 55-gallon drum products and the Bay Area Drum Company.

25. *Did Respondent ever purchase drums or other containers from a drum recycler or drum reconditioner? If yes, identify the entities or individuals from which Respondent acquired such drums or containers.*

RESPONSE:

Yes. Bay Area Drum Company.

26. *Prior to 1988, did Respondent always keep its waste streams that contained SOIs separate from its other waste streams?*

RESPONSE:

Yes.

27. *Identify all removal and remedial actions conducted pursuant to the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. § 9601 et seq., or comparable state law; all corrective actions conducted pursuant to the Resource Conservation and Recovery Act, 42 U.S.C. § 6901 et seq.; and all cleanups conducted pursuant to the Toxic Substances Control Act, 15 U.S.C. § 2601 et seq. where (a) one of the COCs was addressed by the cleanup and (b) at which Respondent paid a portion of cleanup costs or performed work. Provide copies of all correspondence*

Craig Whitenack
May 20, 2011
Page 14

between Respondent and any federal or state government agency that (a) identifies a COC and (b) is related to one of the above-mentioned sites.

RESPONSE:

InterState Oil was identified as a Potentially Responsible Party in 1991 by the California EPA, Department of Toxic Substances Control (DTSC) for remedial and removal action costs incurred during the cleanup of the Bay Area Drum Site. The Site was located at 1212 Thomas Avenue at the northern corner of Hawes Street, in the Hunter's Point district of San Francisco. The cleanup action was directed at remedying soil and groundwater on-site contaminants from the Site and areas immediately adjacent to the Site.

InterState Oil was identified as a PRP in the 1991 remedial and removal action for the same reasons for which it is a current PRP in this action, namely its agreement with Bay Area Drum Company by which Bay Area Drum Company would come to InterState Oil's facility in Sacramento where Bay Area Drum Company's employees would inspect the drums, load the drums, transport them to the facility in the Bay Area and recondition the drums. InterState Oil's best recollection is that the majority of the barrels that were reconditioned by Bay Area Drum Company contained residue of unused, new motor oils. These were HD (heavy duty) 30 weight, ND (non-detergent) 30 weight, 50-30 weight and multi-viscosity weight oils 5-30, 10-30, 10-40 and 20-50. During the 1991 action by the DTSC, InterState Oil joined a group of other PRPs identified by the EPA. The PRP group settled with the state for their collective share of the costs of the remedial and removal action.

InterState Oil understands that the EPA is already in possession of DTSC's files regarding the BAD Site, and to the extent that EPA is not in possession of these files, they are readily available to EPA. InterState is attaching as Exhibit C all correspondence between the DTSC and InterState Oil regarding the 1991 removal and remedial action as well as invoices from the DTSC to Bay Area Drum Company.

28. *Provide all records of communication between Respondent and Bay Area Drum Company, Inc.; Meyers Drum Company; A.W. Sorich Bucket and Drum Company; Waymire Drum Company, Inc.; Waymire Drum and Barrel Company, Inc.; Bedini Barrels Inc.; Bedini Steel Drum Corp.; Bedini Drum; or any other person or entity that owned or operated the facility located at 1212 Thomas Avenue, in the City and County of San Francisco, California.*

RESPONSE:

Craig Whitenack
May 20, 2011
Page 15

DTSC conducted an extensive investigation of the BAD Site and InterState Oil's operations in connection with it. DTSC's files include extensive records concerning the Bay Area Drum Company, Inc. and other persons and entities that owned or operated the facility located at 1212 Thomas Avenue, in the City and County of San Francisco, California. InterState Oil understands that EPA is already in possession of DTSC's files regarding the BAD Site, and to the extent that EPA is not in possession of these files, they are readily available to EPA.

Other than the invoices and receiving tickets from the Bay Area Drum Company referenced throughout the Responses, InterState Oil does not have any records of communication between itself and any of the above companies. The invoices and receiving tickets from the Bay Area Drum Company are attached as Exhibit B.

29. *Identify the time periods regarding which Respondent does not have any records regarding the SOIs that were produced, purchased, used, or stored at the Facilities.*

RESPONSE:

In responding to the RFI, InterState Oil has undertaken a diligent and good faith search for, and review of, documents and information in its possession, custody or control and that are relevant to this matter. Moreover, InterState Oil understands that EPA is already in possession of DTSC's files regarding the BAD Site. InterState Oil is under no further obligation to identify time periods to which these documents do not pertain.

Defendant is attaching all of the documents it has concerning the BAD Site and the Bay Area Drum Company during the Relevant Time Period.

30. *Provide copies of all documents containing information responsive to the previous twenty-nine questions and identify the questions to which each document is responsive.*

RESPONSE:

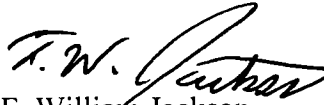

Exhibit A includes spreadsheets reflecting the amount of oil, solvent, kerosene, and anti-freeze it purchased from 1982 to 1987 which are responsive to Request Nos. 4 and 13. Exhibit B includes all of the documentation InterState Oil is able to locate regarding any transaction with any company throughout its history connected with the BAD Site which is responsive to Request Nos. 18 and 23. Exhibit C includes correspondence between the DTSC and InterState Oil regarding the 1991 removal and remedial action as well as invoices from the DTSC to Bay Area Drum Company which are responsive to Request No. 27.

Craig Whitenack
May 20, 2011
Page 16

We are hopeful that these amended responses satisfy your prior concerns about our initial responses.

Very truly yours,

PORTER SCOTT

Re: State of California EPA v. Andrews

Dear Gan:

As you are aware, this office has been retained to represent Interstate Oil Company with regard to the Bay Area Drum Site. This will confirm our telephone conversation on January 30, 1992 at which time you graciously agreed to extend our time to respond to your December 20, 1991 letter up to, and including, February 10, 1992. Every effort will be made to provide the appropriate response within that time frame.

This will further confirm that we will be inspecting documents at your office concerning this matter on Monday, February 3, 1992. We will likely arrive at your office sometime around 10:00 a.m. and will need most of the day to conduct our document review.

Your professional courtesy and cooperation with respect to this matter is greatly appreciated.

Very truly yours,

PORTER, SCOTT, WEIBERG & DELEHANT

Re: Interstate Oil Company

Dear Ms. Gan:

As you are aware, this office and both John W. Delehant and the undersigned have been retained to represent the interests of Interstate Oil Company and Mr. Terrance Andrews. We have been provided with a copy of Barbara Cook's correspondence to Interstate Oil dated December 20, 1991. We previously confirmed in writing the extension you were gracious enough to grant to us to respond to the request for documents through February 10, 1992. The following is our response to the document request served by your department on Interstate Oil pursuant to Health and Safety Code Sections 25185.6, 25358.1, and 25358.3.

At the outset we wish to place our response in the proper context. Since we were initially retained on this matter we have had an opportunity to review departmental files at your office in Berkeley. It is clear from our brief review of these voluminous documents, that the Department's cleanup activities at this site have been ongoing for a number of years. In fact, it appears as though the site has been substantially remediated, particularly in light of the page and one-half letter received from Mr. Hoskins of your Cost Recovery Unit asking for a check in the amount of \$3,101,428.29 to reimburse the State "for the costs incurred at the site". Mr. Hoskins' letter goes on to state that the costs being sought pertain to cleanup at the Bay Area Drum site during the period July 1, 1985 through September 30, 1991.

We further understand from discussions with your office as well as with Mr. Kevin James with the California

WEIBERG
& DELEHANT**
A Professional Corporation

Attorney General's office in Oakland that the formal cost recovery action is expected to be filed as early as March 1, 1992. As you are probably aware, had the document request served by your office been generated by the AG's office after the litigation was filed, we would have the legal right to object, as appropriate, to the document requests. In light of the impending filing of the action, and because we are confident that the DTSC would not abuse its authority under the Health and Safety Code to preclude legal rights of responsible parties, we have incorporated herein our objections as if the request had been served in the context of litigation filed by the Attorney General's office.

We initially object to the identification of Interstate Oil as one of the 15 responsible parties. We know from our review of your files that there are many, many more PRPs. We presume that someone made the arbitrary determination to select 15 from the much greater number. We previously requested from Barbara Cook, and subsequently from Bill Brown a roster of all identified responsible parties, together with addresses, phone numbers, other applicable identifying information, and any statistical data in the possession of the Department concerning the quantities of drums shipped from each identified responsible party to this site. We have yet to receive this information. The arbitrary designation of Interstate Oil as one of a select group of 15 responsible parties is simply inappropriate.

We further object to the identification of Interstate Oil as a responsible party on the ground that it does not appear Interstate Oil shipped significant quantities of materials which can be properly classified as "hazardous" pursuant to Health and Safety Code Section 25316. In fact, Interstate Oil was in the business of selling motor oils. To the degree spent 55-gallon drums which were previously full of new motor oil found their way to the Bay Area Drum facility, any remaining motor oil which would have been cleaned out of the drums would fall under the petroleum exclusion as set forth in Health and Safety Code Section 25317. If you are aware of any hazardous materials not falling within the purview of Section

California Environmental Protection Agency
February 10, 1992
Page 3

25317(a) and which came from Interstate Oil we request that you provide us with that information immediately.

We further object to the scope of the document request made by the Department pursuant to Health and Safety Code Section 25185.6. That Section provides as follows, in pertinent part:

"The department, in connection with any action authorized by this division, may require any of the following persons to furnish and transmit to the designated offices of the department any existing information relating to hazardous substances, hazardous wastes, or hazardous materials. . . ." (Emphasis added.)

As indicated above, your document request is being made with full knowledge that a formal cost recovery action is imminent. We object to the document request, in its entirety, on the ground that Health and Safety Code Section 25185.6 does not authorize pre-litigation discovery in the context of a soon to be filed cost recovery action. In fact, Section 2518.6 speaks to authorizing collection of documents in connection with any "action". The term "action" is defined neither by Chapter 6.5 nor the Health and Safety Code in general. However, this term is defined elsewhere as including "a civil action and a criminal action". Code of Civil Procedure Section 105. Evidence Code Section 120 defines a "civil action" as including civil proceedings. However, without waiving this objection, and the other objections stated herein, Interstate Oil will produce documents as specified below.

Health and Safety Code Section 25185.6 authorizes the collection of information "relating to hazardous substances, hazardous wastes, or hazardous materials". Assuming that the term "action" as used in this statute is to be construed more broadly than is indicated above, the permissible scope of documents which can be required to be produced is much narrower than that contained in your December 20, 1991 correspondence. To the extent your requests seek information of a nature not specifically relating to hazardous substances, wastes or

& DELEHANT**
A Professional Corporation

materials, Interstate Oil objects to producing these documents on the grounds set forth herein. However, without waiving this or any of the other objections set forth above, Interstate Oil agrees to produce the documents hereinafter set forth.

In addition to citing the authority of Health and Safety Codes 25185.6, you purport to rely upon Health and Safety Code Sections 25358.1 and 25358.3 as authority for requesting documentary information. Neither of these sections has any applicability where the request for documents is made in the context of a cost recovery action. Section 25358.1 applies only where the Department needs assistance "in determining the need for a response to a release or threatened release". Not so the case here. Likewise, Section 25358.3 has no applicability to "discovery" in the context of an imminent cost recovery action. That section empowers the Department to take certain actions upon making the determination that there exists an imminent and substantial endangerment to the public health or welfare or to the environment, because of release or a threatened release of a hazardous substance. Nowhere in this section is there authority for requiring the production of information in the context of a cost recovery action. However, should you have information which leads the Director of the Department to reasonably believe that there is either a release or a threatened release which constitutes an imminent and substantial endangerment concerning which he needs information in order to take appropriate protective action, please advise and we will respond accordingly. However, based upon the information you have provided to us, Mr. Hoskins' correspondence from the cost recovery action, and our review of your files, it does not appear that there is currently an imminent or substantial endangerment which would authorize any action pursuant to Section 25358.3.

Subject to the general objections set forth above as well as specific objections made with response to individual requests, Interstate Oil provides the following information with regard to the requests set forth in your December 20, 1991 correspondence.

California Environmental Protection Agency
February 10, 1992

A Professional Corporation

1. Interstate Oil commenced doing business as a sole proprietorship in approximately October of 1970. The business was incorporated as a California corporation in 1972. Since its inception, the company has been a wholesale distributor of petroleum and automotive related products. In the initial years of business the vast majority of products sold were motor oils by the case.

Interstate Oil evolved to its present condition where the majority of its product is sold in bulk form. For example, motor oils were bought in bulk and then pre-packaged in 55-gallon drums. During the early years of bulk sales the empty drums were returned to the original supplier. Eventually, the industry changed and Interstate Oil began purchasing in bulk and re-filled in Interstate's own drums. This gave rise to the necessity to refurbish drums from time to time. Over the years Interstate has dealt with a variety of companies for the purpose of cleaning and refurbishing 55-gallon drums.

One of these companies was Bay Area Drum Company. Included herewith and marked as Exhibit "A" to this letter are the invoices which Interstate has been able to locate with regard to shipments of drums to the Bay Area Drum facility. A brief review of these documents will reveal that the first invoice is dated December 14, 1981 and the last invoice is dated February 26, 1987. We know from our review of your files that you are already in possession of many, if not all of the invoices attached as Exhibit "A".

Bay Area Drum Company would come to Interstate's facility in Sacramento where Bay Area's employees would inspect the drums, load the drums, transport them to the facility in the Bay Area, recondition the drums, and return them to Interstate Oil in Sacramento.

Interstate's best recollection without the benefit of extensive investigation or a comprehensive record review, is that the majority of the barrels that were reconditioned by Bay Area Drum Company contained residue of unused, new motor oils. These were HD (heavy duty) 30 weight, ND (non-detergent) 30 weight, 50-30 weight and multi-viscosity weight oils 5-30, 10-30, 10-40 and 20-

A Professional Corporation

50. During the years in question, 1981 through 1987, Interstate also sold smaller quantities of automatic transmission fluid, solvent, kerosene, and anti-freeze. Other than the attached invoices, which are voluntarily supplied, at this time Interstate Oil cannot supply any more specific information.

2. Terry Andrews, Bill Simas and Royce G. Andrews (deceased January 2, 1992) would be the individuals most knowledgeable with respect to 55-gallon drum products.

3. As indicated in the response to your first question, Interstate Oil was a closely held corporation. It is owned by Terry W. Andrews, President, and Laurie Andrews, Secretary-Treasurer. Interstate's main office is in Sacramento, California, and there are currently branch offices in Fresno, California and Sparks, Nevada. Interstate Oil objects to the production of corporate records which are unrelated to hazardous substances, wastes or materials as such request is outside the scope of Health and Safety Code Section 25185.6.

4. Interstate Oil hereby objects to producing the requested documents concerning the financial condition of the corporation. This information is privileged, proprietary, confidential, bears no relationship to hazardous substances, wastes or materials, and this request is not calculated to reasonably lead to any such documentation. Interstate Oil further objects not only on the general grounds set forth above, but also on the basis provided by Civil Code Section 3295.

5. Interstate Oil objects to producing information concerning its insurance coverage in the context of a request pursuant to Health and Safety Code Section 25185.6. The existence or non-existence of insurance coverage is wholly unrelated to hazardous substances, wastes, or materials. Without waiving the objections stated above and herein, Interstate Oil provides such information concerning the applicable insurance available to it during the pertinent time frame as is presently available. This information is provided in Exhibit "B".

6. Royce G. Andrews, Interstate's Purchasing Manager, was the individual with Interstate Oil who dealt with the barrel reconditioning companies. As indicated above, Royce G. Andrews died on January 2, 1992. Defendant has no information concerning conditions at the Site (defined as the Bay Area Drum Site located at 1212 Thomas Avenue in San Francisco) beyond that which has been made available to Interstate by the Department either through correspondence or through a review of documents by Interstate Oil's counsel at the DTSC Region 2 facilities in Berkeley. Such information is equally available to the Department, would constitute attorney work product, and Interstate Oil objects on those additional grounds, as well.

7. John W. Delehant and Craig A. Caldwell of Porter, Scott, Weiberg & Delehant, attorneys for Interstate Oil Company and Terrance W. Andrews, President Interstate Oil Company. The records reviewed include those attached hereto as Exhibit "A" and the documents reviewed by our counsel at DTSC Region 2 in Berkeley.

8. See response to question number 7, above.

Please forward all future communications with respect to this matter to Craig A. Caldwell, Porter, Scott, Weiberg & Delehant, P. O. Box 255428, Sacramento, California 95865. As indicated, we have been advised by your office as well as the Attorney General's office that the filing of litigation is imminent. We have received permission from the client to accept service of process and we request that you simply send any summons and/or complaint directly to our office along with a notice and acknowledgement of receipt. This will avoid having DTSC incurring service costs and also avoid the incumbent embarrassment of disruption of normal business activities that is occasioned by personal service.

Once again, we thank you for your initial courtesy and cooperation with respect to this matter, and we look

DEPARTMENT OF TOXIC SUBSTANCES CONTROL

400 P Street, 4th Floor
P.O. Box 806
Sacramento, CA 95812-0806
(916) 322-2337

December 31, 1991

Mr. Terrence Andrews
Interstate Oil Company
8221 Alpine Avenue
Sacramento, California 95826

Dear Mr. Andrews:

Your company has been identified as one of the 15 responsible parties (RPs) for remedial or removal action costs incurred during the cleanup of the Bay Area Drum site. California Health and Safety Code, Section 25360, provides for the recovery of costs from RPs as follows:

"Any costs incurred and payable from the state account or the Hazardous Substances Cleanup Fund shall be recovered by the Attorney General, upon the request of the department, from the liable person or persons. The amount of any costs which may be recovered pursuant to this section, for a remedial or removal action paid from the Hazardous Substance Cleanup Fund, shall include the amount paid from that fund and interest on that amount calculated at a rate equal to the interest rate of the bonds sold pursuant to Article 7.5 (commencing with Section 25385). In addition, the person or persons are liable to the department for administrative costs in an amount equal to 10 percent of the reasonable cost actually incurred, or five hundred dollars (\$500), whichever is greater."

The federal Comprehensive Environmental Response, Compensation, and Liability Action (CERCLA) of 1980, Section 107, also authorizes cost recovery from RPs.

RPs may be held jointly and severally liable for site cleanup costs under CERCLA. This means that the Department of Toxic Substances Control (DTSC) may collect the entire amount due for the costs incurred at the site from any one RP. The invoice is for all cleanup costs incurred at this site. Enclosed with this letter is a list of all RPs for this site. You may wish to negotiate with the other RPs to allocate the site cleanup costs among yourselves.

The site cleanup costs for the Bay Area Drum site during the period July 1, 1985 through September 30, 1991 are summarized on the enclosed invoices. Please be advised that if additional costs from this period or from prior or subsequent periods are discovered, they will also be billed. For your information, we have enclosed a detailed listing of DTSC's employees who worked on the site along with their

Mr. Terrence Andrews
December 31, 1991
Page 2

classification, hours worked, pay period and dollar amounts. If applicable, we show charges for private contractors, travel expenses, lab costs, interest, and administrative charges.

Please attach a check or money order payable to the Department of Toxic Substances Control in the amount of \$3,101,428.29 to one copy of the enclosed invoices and remit it to:

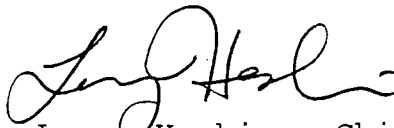

Department of Toxic Substances Control
Accounting Unit
400 P Street, 4th Floor
P.O. Box 806
Sacramento, CA 95812-0806

These invoices are due and payable within sixty (60) days of the date of this letter. By mailing this payment to the above address with a copy of the invoices within 60 days, you will ensure that it is credited to the proper account and forestall any additional collection action by DTSC.

Although the entire balance of these invoices is currently due, any partial payments will terminate future interest charges on the amount paid. Interest will continue to accrue on any portion of the outstanding balance not paid within 60 days.

Thank you for your cooperation in this matter. Please contact Ms. Jeanne Machado-Derdowski at Department of Toxic Substances Control, P. O. Box 806, Sacramento, CA 95812-0806 or call (916) 322-1313 if you have any questions regarding this invoice.

Sincerely,

Larry Hoskins, Chief
Cost Recovery Unit

December 20, 1991

CERTIFIED MAIL
RETURN RECEIPT REQUESTED

Mr. Terrance Andrews
Interstate Oil Company
8221 Alpine Avenue
Sacramento, California 95826

Dear Mr. Terrance Andrews:

The California Environmental Protection Agency, Department of Toxic Substances Control (Department) has determined that the Bay Area Drum Site (hereafter the Site) in San Francisco, California has a soil and ground-water contamination problem. The Site is located at 1212 Thomas Avenue at the northern corner of Hawes Street and is in the Hunter's Point district of San Francisco, California. A map of the Site area is enclosed with this letter. It is currently occupied by an abandoned office/processing plant building and the former drum reconditioning yard, which is now a flat, capped yard. The Site is fenced off from the surrounding neighborhood.

Drum recycling and reconditioning activities were undertaken by several companies, including Bedini Steel Drum, Myers Drum, Waymire Drum Co., and Bay Area Drum Co. from 1948 to 1987. The identified Site contamination consists of 60 chemical contaminants in the soil and the groundwater on-site and 58 chemical contaminants in areas immediately adjacent to the Site. Soil contamination in the drum yard includes chromium, lead, nickel, and zinc at concentration exceeding the Total Threshold Limit Concentration (TTLC) and VOCs 1,1,2,2-tetra-chloroethane, chloroform, and trichloroethene (TCE) at concentrations exceeding the State Designated Level (DL). The semi-volatile organic compounds phenanthrene and pyrene were also detected at concentrations exceeding the State DL. Pesticides and PCBs were detected at concentrations exceeding the TTLC or DL in the drum yard and in the process plant building. These chemicals are considered hazardous substances pursuant to the California Health and Safety Code (H&SC) section 25316.

The purpose of this letter is to request information from companies and individuals who did business with the Bay Area Drum Company to obtain information regarding, among other matters, the type and quantity of hazardous substances that were sent to the Site. These hazardous substances may have been released at the Site. Each of these companies was identified as a generator of hazardous substances sent to the Site during a review of the records of the Site

operators. These records include manifests, invoices, receiving tickets, and other documents, which identify individual companies, and the quantities and types of drums disposed of at the Site. The Department has identified Interstate Oil Company as a Potentially Responsible Party (PRP) as defined in section 25323.5(a) in regards to the Site. Pursuant to the authority of Health and Safety Codes sections 25185.6, 25358.1, and 25358.3, the Department requests that you supply the Department with all information currently known or available to you relating to the Site within 30 calendar days of the date of this letter.

The specific questions to be answered by you are preceded by a list of instructions and definitions of terms.

Information Request
Instructions

A. General Instructions

The procedures described below shall be followed in responding to each and every question and subpart of a question set forth in this information request.

1. Provide a separate narrative response to each and every question and subpart of a question set forth in this information request letter.
2. Precede each answer with the number of the question to which it corresponds.
3. Identify the person(s) answering each question and subpart of a question on behalf of you.
4. For each question and subpart of a question, identify each person consulted in the preparation of the answer.
5. For each question and subpart of a question, identify all documents consulted, examined or referred to in the preparation of the answer or that contain information responsive to the question and provide true and accurate copies of all such documents.
6. If you have reason to believe that there may be persons able to provide a more detailed or complete response to any question or subpart of a question or who may be able to provide additional responsive documents, identify

December 20, 1991

each such person and the additional information or documents that each may have.

7. For each and every question contained herein, if information responsive to this information request is not in your possession, custody or control, then identify the persons from whom such information may be obtained.
8. The terms "and" and "or" shall be construed either disjunctively or conjunctively as necessary to bring within the scope of this information request letter any information that might otherwise be construed to be outside its scope.
9. Words in the masculine shall be construed in the feminine and vice versa, and words in the singular shall be construed in the plural and vice versa, where appropriate in the context of a particular question or questions.
10. For questions 1- 9, an answer must be prepared for Interstate Oil Company, its parent and subsidiary corporations, including wholly and partially owned entities, either presently or at any time in the past that either generated or transported hazardous waste that was sent to the Site.

B. Scope of the Request

This information request is directed to Interstate Oil Company, its parent and subsidiary corporations, including wholly and partially owned entities, and covers all information in your possession, custody and control, including information in the possession of your employees, agents, servants, representatives, your attorneys, or other persons directly or indirectly employed or retained by you, or anyone else acting on your behalf or otherwise subject to your control.

C. Incomplete Response

If any question cannot be answered fully, as full an answer as possible should be provided. In such a case, state the reason for the inability to answer fully and give any information, knowledge, or belief that you have regarding the unanswered portion.

D. Lack of Information

If you currently lack information to answer any question completely, please state:

1. The responsive information currently available
2. The responsive information currently unavailable
3. Efforts that you intend to make to secure the information currently unavailable
4. When you anticipate receiving the information currently unavailable.

E. Supplemental Responses

If information or documents not known or not available to you as of the date of submission of a response to this information request should later become known or available to you, you must supplement your response to the Department.

Moreover, should you find, at any time after the submission of your response, that any portion of the submitted information is false or misrepresents the truth, you must notify the Department of this fact as soon as possible and provide the Department with a correct response.

F. Identification of a Natural "Person"

Whenever this information request asks you to identify a "person" where the person is a natural person, state or identify the person's:

1. Name
2. Present or last known business address and business telephone number
3. Present or last known home address and home telephone number
4. Occupation or profession and job title.

G. Identification of a Non-Natural "Person"

Whenever this information request asks you to identify a "person," where the person is not a natural person, but otherwise falls within the definition set forth in H&SC section 25319, e.g. a corporation, partnership, business trust, or other association, or business entity (including a sole proprietorship), state or identify the person's:

1. Name
2. Legal form (e.g. corporation, partnership, etc.)
3. Present or last known principal place of business

4. Telephone number
5. A brief description of its business.

H. Identification of a Document

Whenever this information request asks you to identify a document, state or identify:

1. Its date
2. Any identifying number, such as an invoice or purchase order number
3. Its author and signatory
4. Its addressee(s) and all other persons receiving copies of the documents
5. The type of document it is (e.g. letter, memorandum, contract, report, etc.)
6. Its title
7. A summary of its substance or subject matter
8. Its custodian
9. Its present or last known location.

I. Document Production

In addition to a full and complete written answer, supplementary information contained within one or more documents that is responsive to the question may be included. In your response to the question, state the relevant document title, identify the specific section or pages from the document that are responsive to the question, and mark the relevant question number on the document.

J. Deletion from Documents

Wherever possible, complete documents should be submitted. If a document contains voluminous information irrelevant to answering a question, such irrelevant sections may be deleted. If anything has been deleted from a document produced in response to this information request you must:

1. Specify the nature of the material deleted
2. Specify the reason for the deletion
3. Identify the person responsible for the deletion.

K. Estimates

Precise figures or dates shall be provided in response to all question calling for numerical or chronological information. Questions calling for numerical or chronological information shall be deemed to call for estimates, only to the extent that precise figures or dates are not known. In each instance that an estimate is given, the estimate should be identified as such and the source of the information underlying the estimate must be provided.

L. Confidential Business Information

The information requested herein must be provided even though you may contend that it includes confidential business information. You may, if you desire, assert a confidentiality claim covering part or all of the information requested, pursuant to H&SC sections 25173 and 25358.2, by attaching a cover sheet clearly marked "Confidential Business Information," which explains the rationale for considering this information confidential. Please include the specific citation from the Government Code exempting this information from the California Public Records Act. The Department will construe the failure to furnish a claim of confidentiality with your response as a waiver of that claim, and such information may be made available to the public without future notice.

Definitions

All terms not defined herein shall have their ordinary meanings, unless such terms are defined in the Hazardous Substances Account Act, (California Health and Safety Code §§ 25310, *et seq.*) in which case the statutory definitions shall apply. Unless otherwise indicated, the following definitions shall apply to the following terms as they are used in this information request.

- A. The term "document" shall mean any object that records, stores or presents information, and includes writings of any kind, formal or informal, whether or not wholly or partially in handwriting, including by way of illustration and not by way of limitation, any invoice, manifest, bill of lading, receipt, endorsement, check, bank draft, cancelled check, deposit slip, withdrawal slip, order, correspondence, record book, minutes, memorandum of telephone, and other conversations including meetings, agreements and the like, diary, calendar, desk pad, scrapbook, notebook, bulletin, circular, form, pamphlet, statement, journal, postcard, letter, telegram, telex, report, notice, message, analysis, comparison, graph, chart, interoffice or intraoffice communications, photostat or other copy of any documents, microfilm, or other film record, any photograph, sound recording on any type of device, any punch card, disk or disk pack, any tape or other type of memory generally associated with computers and data processing (together with the programming instructions and other written material necessary to use such together with printouts of such punch card, disk, or disk pack, tape or other type of memory) and every copy of each document which is not an exact duplicate of a document which is produced, every copy which has any writing, figure or notation, annotation or the like on it, drafts attachments to or enclosures with any document every document referred to in any other document.
- B. The term "hazardous substance" shall have the same definition as that contained in H&SC section 25316 and includes any mixtures of such hazardous substances with any other substances, including petroleum products. It shall also include any residual amounts of any hazardous substances left on containers used to store hazardous substances.
- C. The term "hazardous waste" shall have the same definition as that contained in H&SC section 25117.
- D. The term "person" shall have the same definition as in H&SC section 25319.
- E. The term "release" shall have the same definition as that contained in H&SC section 25320 and includes any spilling, leaking, pumping, poring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment, including the abandonment or discharging of barrels, containers, and other closed receptacles containing any hazardous substance or pollutant or contaminant.
- F. The term "Site" shall mean the Bay Area Drum Site located in San Francisco, California, located at 1212 Thomas Avenue at the northern corner of Hawes

Street, in the Hunter's Point district of San Francisco, California (see attached map).

- G. The terms "you" or "your company" shall mean Interstate Oil Company, its current and former parent and subsidiary corporations, including wholly and partially owned entities and Interstate Oil Company employees, contractors, trustees, current and/or former partners, successors, assigns, and agents.
- H. The term "your facility" means Interstate Oil Company: 8221 Alpine Avenue, Sacramento, California, and any other facility under your control that sent any substance to the Site.
- I. The term "drum" means any container that was used to store or transport any liquid, granular, or powder substance.

Information Request Questions

- 1. Provide all information relating to your hazardous substances management practices for all hazardous substances including any petroleum refinery products, that were used, generated, stored, treated, disposed of, or otherwise handled in or at your facility for the years 1948-1987. The description of hazardous substances management practices should include:
 - A. For all hazardous substances, including any petroleum refinery products, obtained for your facility's operations in drums, identify:
 - The nature of the hazardous substances in the drum
 - The number of drums obtained per month
 - The type and capacity of each drum
 - The disposition of the drums after the hazardous substances were used
 - The residual level left in each drum after the hazardous substances were used
 - The methods used to determine the residual levels in each drum.

- B. For all hazardous substances, including any petroleum refinery products, stored in drums at your facility, identify:
- The nature of the hazardous substances contained in the drum
 - The number of drums stored per month
 - The type and capacity of each drum
 - The disposition of the drums after the substance was used
 - The residual left in each drum after the hazardous substances was used
 - The methods used to determine the residual levels in each drum.
- C. For all hazardous substances, including any petroleum refinery products, disposed of in drums by your facility at the Site, identify:
- The nature of the hazardous substances contained in the drum
 - The number of drums disposed of per month
 - The type and capacity of each drum
 - The disposition of the drums after the hazardous substances were disposed of
 - The residual levels left in each drum after the hazardous substances were disposed of
 - The methods used to determine the residual levels in each drum.
- D. For all drums that once contained hazardous substances, including any petroleum refinery products, that were sent from your facility to the

Site and that you assert contained no hazardous substances when they left your facility, identify:

- The nature of the hazardous substances originally contained in the drum
 - The number of drums disposed of per month
 - The type and capacity of each drum
 - The disposition of the drums after the hazardous substances were disposed of
 - The method used to remove all residual hazardous substances from the drum
 - The method used to determine that no hazardous substances remained in the drum.
2. Identify all persons who have knowledge or information about the generation, use, storage, treatment, disposal, or other handling of hazardous substances at your facility. If you have reasons to believe that there may be persons able to provide a more detailed or complete response to any question contained herein, or who may be able to provide additional responsive documents, identify such persons and the additional information or documents they may have.
3. Describe the legal organization of Interstate Oil Company, (e.g. corporation, limited partnership) including:
- A history of the organizational structure
 - A listing of all current and past subsidiaries and operational divisions and parent corporations
 - Corporate officers, names, titles, and responsibilities for each corporate entity
 - Dates of incorporation and dissolution for each corporate entity

- Dates of any name changes of the corporate entities
- Copies of articles of incorporation, partnership documents, or other organic documents for each corporate entity.

Attach all copies of any documentation of requested information to your response to this letter.

4. Provide the net assets of your company and annual revenues of your company for each of the last five years. Attach financial statements, audits, and other documents that support these figures.
5. Provide a descriptive list of all insurance policies held by your company currently and during any period of your operations during which drums were sent from your facility to the Site that may provide coverage for liability stemming from your disposal of hazardous substances. The description should include:
 - The effective date(s) of the policy
 - The policy number(s)
 - The name and address of the insurance company
 - The amount of coverage under the policy.

Attach copies of all such insurance policies to your response to this letter.

6. Provide any known information on property condition, operations, chemical usage, and releases to the environment by other parties that you may be aware of at the Site. Also provide all information on any other person who may have sent hazardous substances to the Site.
7. Document each person and all files and records reviewed to answer the above questions.
8. Identify the person(s) answering questions on your behalf.

Compliance with the information request set forth above is mandatory, pursuant to sections 25185.6, 25358.1, and 25358.3 of the California Health and Safety Code. Failure to respond fully and truthfully to the information request within thirty (30) days of the date of this letter may result in enforcement action by the Department, subject to the penalties allowed under sections 25189, 25189.2, 25191, and 25367 of the Code. The penalty provided is up to \$25,000 for each violation and

Mr. Terrance Andrews
Page 12
December 20, 1991

up to \$25,000 per day for each day that the violation continues. Please be further advised that provision of false, fictitious, or fraudulent statements or representations may subject you to criminal penalties.

Please send two (2) copies of the information requested to the Department representative:

Monica Gan
California Environmental Protection Agency
Department of Toxic Substances Control
Site Mitigation Branch, Region 2
700 Heinz Avenue, Suite 200
Berkeley, California 94710

Thank you for your cooperation in this matter. If you have any questions relating to the request, please contact Susan Bertken, Senior Staff Attorney, at (916) 322-9422, or Monica Gan, at (510) 540-3767.

Sincerely,

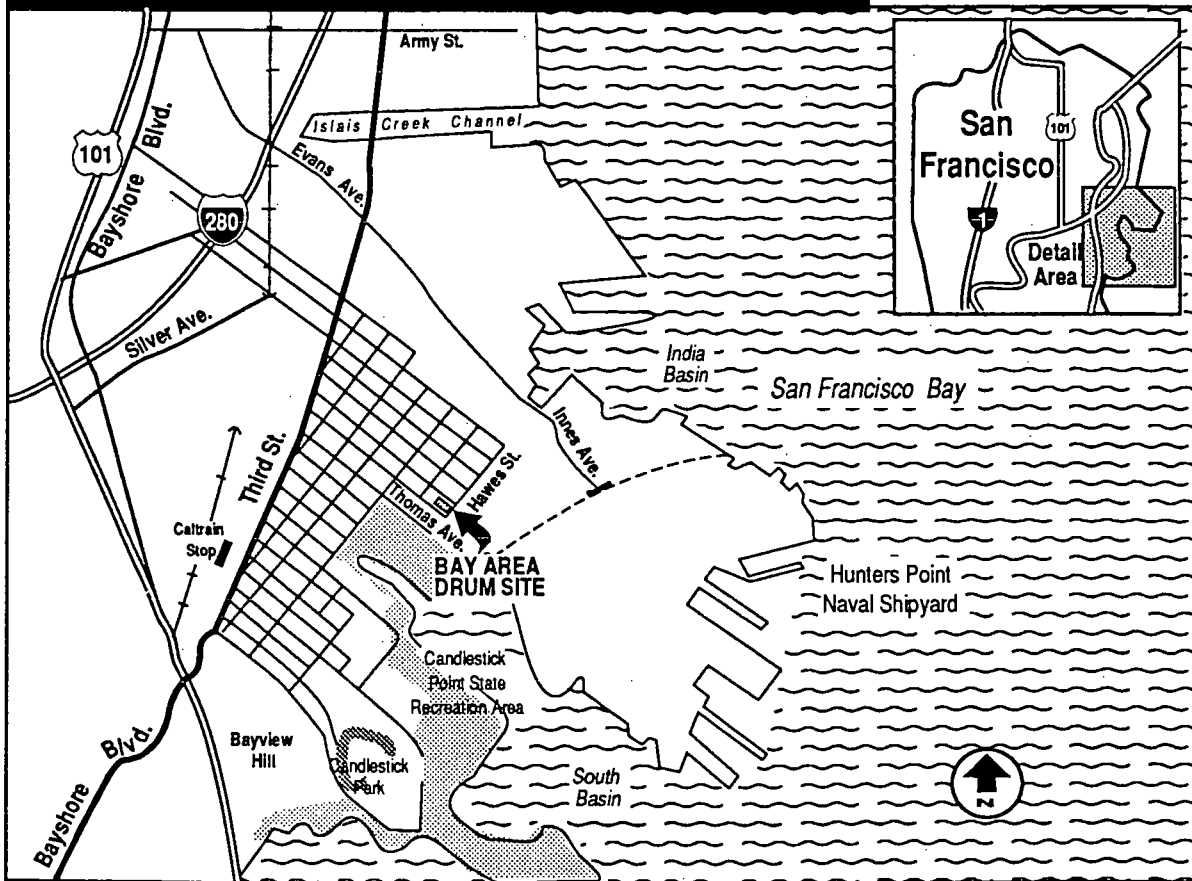

A handwritten signature in black ink, appearing to read "Barbara J. Cook", with a stylized flourish at the end.

COST SUMMARY ADDENDUM

The purpose of this addendum is to provide additional information to responsible parties (RPs) regarding how their costs were calculated and how the cost recovery process works.

A. BOND INTEREST EXPENSE

A portion of the Department of Toxic Substances Control (DTSC) site mitigation costs are funded through bonds issued by the State Treasurer's Office. Interest must be paid to the holders of these bonds and Health and Safety Code Section 25360 requires DTSC to recover this expense from RPs. The interest charged to you is a pass through of the interest expenses incurred by DTSC to pay its bond holders. Bond interest expense is calculated as follows:

1. The State Treasurer's Office calculated the average interest rate for all bonds issued (7.5 percent).
2. The Cost Recovery Unit calculates the amount of bond funds expended in each quarter. (There is no interest expense and therefore no cost recovery of interest expense for non-bond funds.)
3. Interest expense is then calculated for each quarter's bond expenditures as follows:

$$\begin{array}{rclcl} \text{Amount of Bond Funds} & & \text{Annual Interest Rate} & & \\ \text{Expended in Quarter} & \times & \underline{(7.5\%)} & \times & \\ \text{Years Outstanding} & & & & \\ \text{(to nearest quarter)} & = & \underline{\text{Interest Expense for Quarter}} & & \end{array}$$

4. Interest expense for all quarters is then totaled as shown on the cost summary.

B. LABOR CHARGES

State employees are paid on a monthly salary not an hourly rate. Any attempt to translate the monthly salary into an hourly rate will result in variations in the hourly rate from month to month due to: (1) salary changes caused by merit increases, cost of living adjustment, promotions, etc., (2) variations in the number of work hours per month due to holidays and the length of the month, and (3) the effect of overtime accounting which records the hours of overtime in the month worked and the payment in a subsequent month when it is disbursed.

Labor charges include salaries, fringe benefits and an allocation of indirect costs.

C. COST DOCUMENTATION

Time sheets and other accounting documentation are available for review. Arrangements to examine these records can be made through the contact person named in the billing letter.

D. WORK PERFORMED

Questions regarding the nature or amount of the work performed by DTSC staff should be addressed to the project manager in the region responsible for your site.
